powered by partnerships

With regular multipurpose cargo sailings between Asia, Oceania, Middle East, Europe and the Americas, make award-winning global carrier AAL Shipping (AAL) your next port of call for premium project heavy lift, breakbulk and dry bulk cargo solutions – no matter how big or small.

6 Reasons to Choose AAL

Unparalleled Industry Recognition

With a strong safety record and reputation for reliability, AAL is a trusted partner of global industry and has won more international awards for its service ethics and quality than any other carrier in our sector.

'Shipping Line of the Year'
(Heavy Lift Awards 2019, 2022, 2023)

'Best Shipping Line Project Cargo'
(AFLAS Awards 2016 to 2023)

'Best Logistics 2017'
(Lloyd's List Asia Pacific Awards)

'Breakbulk Operator of the Year 2016'
(Global Freight Awards)

'Excellence in Project Cargo 2016'
(Australia Shipping Awards)

Around the World Coverage

AAL's fleet, trade route and cargo expertise and global network (with localised 24/7 customer support) was built to provide our customers with seamless multipurpose cargo shipping services and sailings regularly between Oceania, Asia, Middle East, Europe and the Americas.

With flexibility in mind, we offer access to these regions via a unique 'total' MPP solution of three complementary shipping services that can be combined as required:

- i. Tramp Chartering Solutions
- ii. Scheduled Liner Services
- iii. Fixed Trade Routes

Fleet Control & Diversity

AAL's fleet is over 90% fully owned and comprises multiple classes of premium project heavy lift vessels. It is also one of the sector's largest and youngest 700t max lift and with multiple vessels featuring cargo intake capacity of over 41,000 CBM.

We carry it all for our customers, with significant expertise in parcelling cargoes to offer optimum frequency and economies of scale on every sailing – no matter what your cargo size.

Sustainability & Good Governance

Our global operations on land and sea are carefully monitored around-the-clock and governed by the highest standards of sustainability. We have carefully integrated environmental, economic and social considerations into all aspects of our business and corporate ethics, and employ management systems accredited to latest ISO standards.

AAL has further established a range of QHSE and ESG processes that enable us to: meet the highest safety and efficiency standards in our operations to; care for our people and partners; exceed complex legal legislation in every market in which we operate; and build a leading company culture that engages all entities in a 'zero harm, zero damage' charter.

These global process and infrastructure are further supported in all key areas by a carefully developed network of professional partner, port and commercial agency representatives.

Powered By People

Our global multilingual Chartering, Commercial and Operations Teams work locally with customers to plan, schedule and execute each sailing and provide 24/7 management and oversight during the entire lifecycle of every cargo we handle.

We employ top Marine Engineers to create solutions that can deliver on even the most difficult project demands, with numerous 'firsts' and award-winning operations to their credit.

The expertise of our teams in handling all cargo types, combined with an unparalleled knowledge of our fleet's stowage and lifting capabilities – as well as deep understanding of our customer needs - allows AAL to push boundaries and explore the highest levels of time and cost efficiencies within the parameters of crew and cargo safety.

Optimised Returns & Performance

AAL has a proud history outperforming the market in terms of operational performance, dedication to our customers and delivering value even in the most challenging times.

Each sailing we undertake is monitored closely by our state of the art 'Performance Optimisation Control Room (POCR)' facility that harnesses digital fuel consumption, routing and weather technologies to enable real-time oversight and problem solving that is essential to optimised safety and efficiency performance, and customer returns.
